

## Laminar flow hood class II

### Nano rad 100/130/160 model

#### Features:

Microprocessor Controller displays all important information, centered and angled down for easy reach and viewing; fast and reliable operation. Long-life HEPA filters with 99.95% efficiency for particle size between 0.1 to 0.3 microns.

Covering 100% internal cabin ceilings with the filter to increase efficiency. The efficiency of 70% air filtered into the hood and 30% into the laboratory. Absorption and removal of all microorganisms, smells and pollutant gases. Adjustable time for uv control with 20 second delay for describes damage. Body base, profile and plate material of electrostatic powder paint. Windows alarms to keep the standard airflow.

Second anti UV sash for describes damage.

One-piece stainless steel tray (Seamless).

Strong lighting (up to 1200 LUX).

Low noise and ergonomic design.

Ability to replace filters by user.

Vertical airflow system.

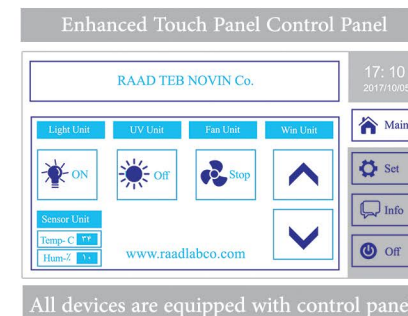

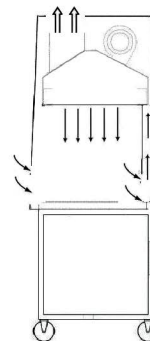

Strong centrifuge fan.

Used on base or table.

Life time for filter.

Two sockets.

|   | Product               | model       | Internal dimensions of cabin (mm) |       |        | External dimensions (mm) |       |        |
|---|-----------------------|-------------|-----------------------------------|-------|--------|--------------------------|-------|--------|
|   |                       |             | length                            | width | height | length                   | width | height |
